2. Authorization for this examiner's amendment was given in a telephone interview with Mr. Tarnoff on 9/15/05.

3. During the interview, Applicant agreed to amend claims 9, 20, 23 and 30 to correct minor informalities. The application has been amended as follows:

- Claim 9, line 8, --of-- has been inserted after "a braking torque".
- Claim 20, the last line, one period has been deleted.
- Claim 23, line 8, --of-- has been inserted after "a braking torque".
- Claim 30, line 2, "section" has been deleted.

4. The following is an examiner's statement of reasons for allowance: The prior art of record does not disclose or render obvious a motivation to provide for a brake control apparatus/method as defined by the limitations of claims 1, 15, 29 and 30; including a control means for controlling an electrical braking torque of a generator, which electrically brakes the second wheel, when the engine applies the engine braking torque to the first wheel, so that a first to second wheel braking torque distribution approaches an ideal braking torque distribution between the first and second wheels based on a computed engine braking torque.
